

Full Visibility and 100% Compliance of Laboratory Operations At All Times

LabHealth

To support laboratory capability improvement programs, Impact offers its unique LabHealth™ IT System. Through customisable dashboards, LabHealth™ collates disparate laboratory data, conducts analysis using SPC techniques. This provides operations and management with key decision making criteria whilst ensuring the laboratory is 100% compliant at all times. LabHealth™ ensures accuracy and consistency improvements in overall laboratory capability to ISO17025 standards which in turn ensures the data being provided to manufacturing is reliable, accurate and precise.

Benefits

- Complete visibility of laboratory function provides assurance of world class performance
- Customisable, easy to use, dashboards provide a real time, high level overview of laboratory performance and user defined historical data and charts
- Detailed information on individual laboratory elements such as techniques, machines and people is made easily accessible through dashboard
- Ensures 100% laboratory compliance at all times through simple, easy to understand warning system and bespoke audit reporting
- Provides a tool for rapid job investigation and reporting
